

PHI LINGS

MASTER
ZLATA KICIN

Our PhiLings Palette consists of two anti-ageing, rejuvenating and bio-regenerative complementary and equally important treatments that can be used in combination or separately - **Microneedling** and **Phi-Ion**.

In our PhiLings trainings, we deal with both of these to the same extent and we train you to be able to properly combine and use them professionally.

Please bear in mind that previous PMU, microblading or experience in other cosmetic treatments is necessary in order to take our PhiLings course.

We provide you with:

- continuous support through our Craft Master application for online studying
- a guided training Manual and Certification of Attendance upon completion of our 2-day course
- one of the best kits in the industry that will allow you to make more money than you invested in our course containing the following:

PREMIUM KIT

Phi Ion Pen + 20 sterile electrodes

Phi Needle Pen + 20 sterile needle modules

Universal Phi Holder + 10 round 5 sterile needles and 10 round 3 sterile needles

Phi wipes 20

Microneedling solution Tango 10 blister mono doses

Microneedling solution Jive 10 blister mono doses

Phi Soothing cream 20 mono doses

Ultimate skin cocktails

After treatment Phi Mask 20

Cosmetic Pencil 1

COURSE OUTLINE

The course covers the following topics to make sure you get the right skills and confidence to perform the treatments:

- Theory on skin structure and characteristics of specific facial skin areas
- Determining different skin types
- Recognizing characteristic skin medical conditions
- Assessing the clients' eligibility to undergo the treatment
- Hygiene and sterility
- Familiarization with tools and devices used for the treatment and their working principles
- Tools maintenance
- Familiarization and practice with different operating modes of the tools

- Application techniques – microneedling:
 - Operating modes (puncture depth and frequency) in treatment of different facial areas and areas to be avoided
 - Proper use of microneedling solution
 - Direction and number of passes
 - Determining when the treatment is over

- Application techniques – Phi-Ion
 - Precise anatomy of the eye region
 - Determining wrinkles and bend lines stage and selection of the areas to be treated
 - Operating modes (energy intensity and electrode diameter)
 - Proper positioning of treatment area and the device
 - Distance between two consecutive micro contact points and forming the treatment line
 - Connecting the points into tarsal lines and forming tarsal band by properly arranging the lines.
 - Forming uplifting lines and band
 - Treating wrinkles outside the eye region

- Expected results – Microneedling
- Expected results – Phi-Ion
- Aftercare – Microneedling
- Aftercare – Phi-Ion

After our 2-day PhiLings training, the students get the Certificate of Attendance and they continue their training via online studying application Craft Master. Craft Master support is provided for 3 months.

Price: 2380 EUR incl. VAT
